

Our approach

Our activities

Our outcomes

Our vision

For Private People

- > Build technology that
 - prevents attacks on people
 - helps people to defend themselves when they are (potentially) attacked
 - helps people to prosecute perpetrators
- > Central point of contact for the reporting of digital attacks
- > Provide & connect to legal and psychological support
- > Raise awareness & educate about digital violence related topics

1. Face Recognition & Hashing Tool
2. Safe sexting / Nude safe incl. Watermarking Tool

IBSA

1. Tool to prevent/ block cyber stalking
2. Open source solutions for platforms and companies, e.g. Deepfake Detector
3. Platform to report and submit digital attacks to law enforcement

1. Run websites
2. Run social channels
3. Talk about IBSA in public
4. Build Healing & Education Platform

IBSA

1. Be contact point for people
2. Expand partner network
3. Build up support groups

IBSA

For Policy Makers

- > Raise awareness & educate digital violence related topics
- > Advice on legislation for more effective law enforcement and prevention

1. Attend & contribute to events
2. Run campaigns & petitions

IBSA

1. Write policy recommendations
2. Meet policy-makers

IBSA

For Internet Platforms

- > Technology that prevents attacks on people
- > Raise awareness & educate digital violence related topics

1. Tool for keeping platforms free from adult abuse material

IBSA

1. Provide consulting services / information on
 - a. how to keep platform free from abuse material/ content
 - b. how to support people affected

IBSA

Empower people to defend themselves from attacks via tech tools

Legal support is provided to affected people

Psychological support for affected people is available

Society is educated about topics related to digital violence

Empower people and legislation to better prosecute perpetrators

Prevent digital attacks through highly likely and consistent prosecution of perpetrators

On the World Wide Web, everyone is safe from attacks of any kind without compromising the freedom and privacy of each individual

IBSA

Image-Based Sexual Abuse (current focus of Digital Dignity e.V.)
